Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Dear Mr. Ippolito:

Our letter of September 13, 1979 indicated that certain corrosion analysis results would be available by December 1, 1979. These results pertained to sensitized stainless steel samples which were removed from inside the reactor vessel during the spring 1979 refueling outage.

The destructive examination, being performed by independent laboratories, has been completed, but the report of the results has not been received. It is planned that these results will be available and transmitted to you by December 31, 1979.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

Donald P. Dise
