Director of Nuclear Reactor Regulation
Attn: Mr. Thomas A. Ippolito, Chief
Operating Reactors Branch #3
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Gentlemen:

Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

In our letter of December 29, 1978 we indicated that under and over voltage alarms would be installed on the reactor protection system motor-generator sets by the end of 1979 at Nine Mile Point Unit 1.

Since that time, we have re-evaluated our position. We feel that a safety grade alarm system should be installed on the motor generator sets as a final solution. This modification will be completed by the end of the Spring 1981 refueling outage. However, in the interim we will continue the surveillance as outlined in your August 7, 1978 letter.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION
