The first part of the document discusses the general principles of the system. It outlines the objectives and the scope of the project. The second part describes the methodology used in the study, including the data collection and analysis techniques. The third part presents the results of the study, which show that the system is effective in achieving its goals. The final part concludes the document and provides recommendations for future research.

The results of the study indicate that the system is highly effective in achieving its goals. The data shows that the system is able to handle a large volume of transactions and is able to process them quickly and accurately. The system is also able to handle complex transactions and is able to provide a high level of customer service. The system is also able to handle a wide range of different types of transactions and is able to provide a high level of security.

The system is able to handle a large volume of transactions and is able to process them quickly and accurately. The system is also able to handle complex transactions and is able to provide a high level of customer service. The system is also able to handle a wide range of different types of transactions and is able to provide a high level of security.

The system is able to handle a large volume of transactions and is able to process them quickly and accurately.

Emergency Preparedness Task Group
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Dear Mr. Grimes:

On January 4, 1980, Niagara Mohawk informed you that an updated emergency plan would be submitted on January 15, 1980. The purpose of this letter is to inform you that the updated plan will be delayed. The reason for this delay is to incorporate any new information which will be obtained at the Nuclear Regulatory Commission's workshop in New York City on January 15, 1980. Niagara Mohawk plans to submit the updated plan within 10 days of that workshop.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

D. P. Dise
