The first part of the document discusses the importance of maintaining accurate records. It emphasizes that proper record-keeping is essential for ensuring the integrity and reliability of the data collected. This section also touches upon the challenges associated with data management, such as ensuring consistency and accuracy across different sources.

In the second section, the focus shifts to the analysis of the collected data. This part describes the various methods used to process and interpret the information, highlighting the need for a systematic approach. The text also discusses the significance of identifying trends and patterns within the data, which can provide valuable insights into the underlying phenomena being studied.

The third section addresses the practical applications of the research findings. It explores how the data can be used to inform decision-making and to develop effective strategies. This part also discusses the importance of communicating the results clearly and concisely, ensuring that the key findings are accessible to a wide range of stakeholders.

Finally, the document concludes with a summary of the key points discussed throughout the report. It reiterates the importance of thorough data collection and analysis, and emphasizes the need for ongoing monitoring and evaluation. The text also offers some final thoughts on the future of the research and the potential for further exploration in this field.

Director of Nuclear Reactor Regulation
Attention: Mr. Thomas Ippolito, Chief
Operating Reactors
Branch #3,
U. S. Regulatory Commission
Washington, D. C. 20555

Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Gentlemen:

Your letter of January 10, 1980 requested a review for Nine Mile Point Unit 1 regarding instances in which the control rods failed to fully insert during 1978 and 1979. Review of that data indicates that at no time did a control rod fail to insert or malfunction on scram.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

Donald P. Dise

Donald P. Dise,
Vice President Engineering
