March 20, 1980

Director of Nuclear Reactor Regulation  
Attn: Mr. Thomas Ippolito, Chief  
Operating Reactor Branch #3  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Re: Nine Mile Point Unit 1  
Docket No. 50-220  
DPR-63

Dear Mr. Ippolito:

Section 3.1.8 Diesel Generator Building Modifications paragraph (2) of the Nuclear Regulatory Commission's Fire Protection Safety Evaluation Report indicates that additional information should be provided for the fire protection of exposed structural steel in the diesel generator rooms at Nine Mile Point Unit 1. The enclosed Niagara Mohawk drawing C-27152-C shows the method which Niagara Mohawk is proposing for protection of the structural steel. Your review is required by April 21, 1980 so that the scheduled installation is not disrupted. If no comment is received by that date, Niagara Mohawk will assume that the Nuclear Regulatory Commission concurs with this method of protecting structural steel.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

D. P. Dise
