Dear Mr. Grier:

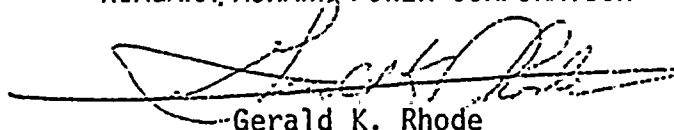

Re: Nine Mile Point Unit 2
Docket No. 50-410

This letter is to inform you that the generic defects in Rosemont trip/calibration units and pressure transmitters reported per 10 CFR 21 on March 21, 1980 by the General Electric Company are also applicable to Nine Mile Point Unit 2. This defect which was reported to the Region V Inspection and Enforcement Office specifically involves the common mode failure of an essential switch in the Rosemont Model 510DU trip/calibration units and in the capacitors in the Rosemont Model 1152 pressure transmitters.

Niagara Mohawk has evaluated this defect and determined that it is not reportable in accordance with Section 50.55 (e) of the Commission's Regulations. The General Electric Company has satisfied the reporting requirements of 10 CFR Part 21.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

Gerald K. Rhode
Vice President
