King of Prussia, PA 19406

Re: Nine Mile Point Unit 1  
Docket No. 50-220  
Supp. No. 2 to I.E. Bulletin 80-17

Dear Mr. Grier:

An alternate vent path continuously open to building atmosphere on the side of the vent valve piping away from the SDV was provided by welding a standpipe to the vent line downstream of the vent valve. Since this vent path is continuously open to the reactor building atmosphere, it will be effective regardless of component operability other than the vent valve.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

T.E. Lempges

Vice-President - Nuclear Generation
