Dear Mr. Eisenhut:

RE: Nine Mile Point Unit #1
Docket No. 50-220
DPR-63

Your letter of July 31, 1980, requested Niagara Mohawk to discuss our plans, schedules and commitments to meet interim criteria for shift staffing contained in your letter. In addition, Niagara Mohawk was requested to develop administrative procedures to govern required shift staffing and movement of key individuals about the plant and to set forth a policy concerning overtime work for the senior reactor operators, reactor operators and shift technical advisor.

In response, Niagara Mohawk will begin training to upgrade Reactor Operator License holders to Senior Reactor Operators. This training is presently planned to begin January 1981. Several scheduling options are presently being considered; however, regardless of which option is finally chosen, Nine Mile Point Unit #1 will be in compliance with your interim shift staffing criteria by July, 1982. Technical Specification changes meeting the required shift staffing criteria will be submitted by January, 1982 for Nuclear Regulatory Commission approval by July, 1982.

Regarding your request to develop an administrative procedure to set forth a policy concerning overtime work for the senior reactor operators, reactor operators and shift technical advisor, Niagara Mohawk has implemented these overtime restrictions in Administrative Procedure, APN-2A. This procedure also governs the movement of key individuals about the plant. This procedure is available on-site for your review.

Very truly yours,

Thomas E. Lempges

Thomas E. Lempges
