NIAGARA MOHAWK POWER CORPORATION/300 ERIE BOULEVARD WEST, SYRACUSE, N.Y. 13202/TELEPHONE (315) 474-1511

December 31, 1980

Darrell G. Eisenhut, Director  
Division of Licensing  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Eisenhut:

Re: Nine Mile Point Unit 1  
Docket No. 50-220  
DPR-63

Niagara Mohawk's letter of December 17, 1980 indicated that the lab ventilation system would be modified by January 1, 1981 to provide a reliable source of ventilation for low background counting of samples as required by TMI Action Plan Item III.D.3.3. The schedule for completion of the lab ventilation modification provided in this submittal was in error. This modification, including pre-operational testing, will be completed prior to startup from the spring 1981 refueling outage.

The December 17, 1980 letter also indicated that revisions to procedures for the analysis of samples required by TMI Action Plan Items II.F.1.2 and III.D.3.3 and the evaluation of a different charcoal canister for the portable iodine monitors required by TMI Action Plan Item III.D.3.3 would be completed by January 1, 1981. Although the procedures have been drafted and the testing of a new charcoal canister has been performed, the procedures will not be approved and issued until January 31, 1981.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION
