Mr. Darrell G. Eisenhut, Director
Division of Licensing
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: Nine Mile Point Unit 2
Docket No. 50-410

Your letter of February 25, 1981 requested Niagara Mohawk to provide an assessment of its existing or planned facility procedures and training programs for station blackout events. In response Niagara Mohawk will address the concerns contained in your letter, when the operating procedures, which will be prepared prior to fuel load, are developed for Nine Mile Point Unit 2.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

Donald P. Dise
Vice President Engineering

1. The first part of the document
 discusses the general principles
 of the system. It covers the
 basic concepts and the overall
 structure of the system.

2. The second part of the document
describes the detailed
implementation of the system.

This section provides a detailed
 description of the system's
 architecture and the various
 components that make up the
 system. It includes a list of
 the hardware and software
 requirements for the system.

3. The third part of the document
describes the testing and
validation of the system.

This section describes the
 testing and validation
 process used to ensure the
 system meets the required
 specifications.

The final part of the document
 describes the deployment and
 maintenance of the system.
