Dear Mr. Dise:

The Commission has issued the enclosed Amendment No. ⁵⁵ to Facility Operating License No. DPR-63 for the Nine Mile Point Nuclear Station, Unit 1. The amendment consists of changes to the Technical Specifications in response to your application dated August 5, 1980.

In your application you requested approval of instrumentation scale changes in order to provide a common reactor reference level. Your request was in response to our letter of May 7, 1980. (This item was subsequently designated Item II.K.3.27 in NUREG-0737 dated October 5, 1980.) The enclosed amendment revises the Technical Specifications to approve the instrumentation scale changes necessary to provide a common reference level. In this regard, note that plant procedures shall be modified to reflect this change and operators shall be trained prior to returning to power operation at the conclusion of the current refueling outage.

The change authorized by this amendment is administrative in nature since the actual level for instrument actuation has not been altered. However, for final resolution of Action Plan Item II.K.3.27 for Nine Mile Point you are requested to provide panel layout drawings that show the reactor water level instrumentation detailing location, scales and name plates. This requested information was specified in our evaluation of the BWR Owners Group position on this item (Letter D. G. Eisenhut to D. B. Waters, dated April 6, 1981). Please provide this information within 30 days of your receipt of this letter.

Copies of the Safety Evaluation and the Notice of Issuance are enclosed.

Sincerely,

Original Signed by
T. A. Ippolito

Dear Mr. Dise:

The Commission has issued the enclosed Amendment No. 55 to Facility Operating License No. DPR-63 for the Nine Mile Point Nuclear Station, Unit 1. The amendment consists of changes to the Technical Specifications in response to your application dated August 5, 1980.

In your application you requested approval of instrumentation scale changes in order to provide a common reactor reference level. Your request was in response to our letter of May 7, 1980. (This item was subsequently designated Item II.K.3.27 in NUREG-0737 dated October 5, 1980). The enclosed amendment revises the Technical Specifications to approve the instrumentation scale changes necessary to provide a common reference level. In this regard, note that plant procedures shall be modified to reflect this change and operators shall be trained prior to returning to power operation at the conclusion of the current refueling outage.

The change authorized by this amendment is administrative in nature since the actual level for instrument actuation has not been altered. However, for final resolution of Action Plan Item II.K.3.27 for Nine Mile Point you are requested to provide panel layout drawings that show the reactor water level instrumentation detailing location, scales and name plates. This requested information was specified in our evaluation of the BWR Owners Group position on this item (Letter D. G. Eisenhower to D. G. Waters, dated April 6, 1981). Please provide this information within 30 days of your receipt of this letter.

Copies of the Safety Evaluation and the Notice of Issuance are enclosed.

Sincerely,

A handwritten signature in cursive script, appearing to read "Tom Ippolito".
