Mr. Darrell G. Eisenhut, Director
Division of Licensing
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Niagara Mohawk provided a description of planned modifications to comply with NUREG 0737 Items II.F.1.1, Noble Gas Monitor and II.F.1.2 Sampling and Analysis of Plant Effluents in submittals dated March 31, 1981 and December 31, 1981 respectively. Subsequent to these submittals, an independent technical assessment of the proposed modifications has identified deficiencies.

Niagara Mohawk is evaluating alternative designs to comply with the requirements of NUREG 0737 Items II.F.1.1 and II.F.1.2. Therefore, additional time until January 1, 1983 will be required to implement the final modifications. The interim measures previously described to you will be utilized to meet the intent of the requirements.

A description of our final design modifications will be provided by October 1, 1981.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

Donald P. Dise

Donald P. Dise
Vice President Engineering
