NIAGARA MOHAWK POWER CORPORATION/300 ERIE BOULEVARD WEST, SYRACUSE, N.Y. 13202/TELEPHONE (315) 474-1511

July 6, 1981

Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Eisenhut:

Re: Nine Mile Point Unit 1  
Docket No. 50-220  
DPR-63

Our letter of December 31, 1979 provided our response to the "Lessons Learned Short-Term Requirements" contained in NUREG 0578. This response indicated for Recommendation 2.2.2b, that a permanent monitor for airborne radioactivity contaminants would be provided in the Technical Support Center by January 1, 1981. Although a permanent continuous air monitor for the Center has been ordered, it has not been delivered to the site. This permanent monitor will be delivered and installed by October 1, 1981. In the interim, a portable air monitor, located in the emergency kit in the Operations Support Center, will be utilized to take air samples.

Our response also indicated for Recommendation 2.2.2b that typers which can print out information on demand would be provided. However, only one typer has been installed. Instead, two CRT's have also been installed. These can provide a continuous display and time history of parameters available to the process computer.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION
