U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Re: Nine Mile Point Unit 2
Docket No. 50-410

Dear Mr. Youngblood:

This letter is to inform you of changes to the background requirements for the Project Quality Assurance Supervisor for Nine Mile Point Unit 2. In response to NRC Request D.3 in the Unit 2 Preliminary Safety Analysis Report, Niagara Mohawk stated that the background requirements for the Project Quality Assurance Supervisor are as follows: "At least ten years in charge of Quality Assurance related work or equivalent experience in the design, construction, or operation of a nuclear facility." These requirements have been revised as follows: "At least ten (10) years of experience in responsible assignments within the field of Quality Assurance, design, manufacturing, construction, operations or related activities and a minimum of one (1) year of equivalent experience related to Nuclear Quality Assurance Activities."

Although there are no regulations which delineate the experience requirements for the supervision within a Quality Assurance Department, the new requirements are consistent with industry practices. This change will also be reflected in the quality assurance section of the Unit 2 Final Safety Analysis Report.

Very truly yours,

William J. Donlon
