Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Dear Mr. Eisenhut:

Our letter of July 6, 1981 indicated that a permanent continuous air monitor for the Technical Support Center would be delivered and installed by October 1, 1981. The monitor was delivered to the site in July 1981 and being portable, required no installation. However, calibration of the monitor has not been completed due to delayed receipt of correlation data from the vendor. Therefore, the calibration procedure review and approval and the calibration of the instrument will be completed by November 30, 1981.

In the interim, a portable air monitor, located in the emergency kit in the Operations Support Center, will be utilized, if required, to take air samples.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

Donald P. Dise
