Dear Mr. Dise:

SUBJECT: NUREG-0737, ACTION PLAN ITEM II.K.3.27 (COMMON REFERENCE LEVEL)

RE: NINE MILE POINT NUCLEAR STATION, UNIT NO. 1

We have reviewed your submittals for the subject action item dated August 5, 1980, December 31, 1980, and June 2, 1981 against the following acceptance criteria:

1. All level instruments should be referenced to the same point.
2. Licensees should commit to modify documentation, including operating procedures and technical specifications, as required, to reflect the new reference level.
3. Licensees should commit to provide appropriate training for plant operators.

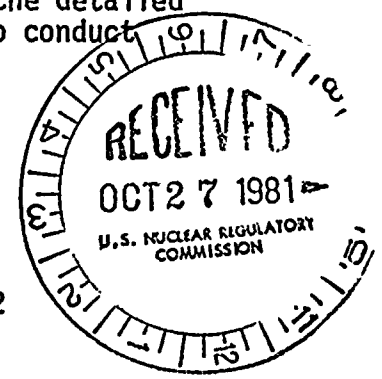

We find your submittals to be acceptable and, therefore, consider Action Item II.K.3.27 to be complete for your facility.

Our review did not encompass a human factors evaluation of your water level instrumentation. That evaluation will be performed as part of the detailed Control Room review (Action Item I.D.1) that you are expected to conduct per NUREG-0737 and NUREG-0700.

Sincerely,
