The first part of the document discusses the general principles of the system. It outlines the objectives and the scope of the project. The second part describes the methodology used in the study, including the data collection and analysis techniques. The third part presents the results of the study, and the fourth part discusses the conclusions and the implications of the findings.

The results of the study show that the system is effective in achieving its objectives. The data analysis indicates that there is a significant correlation between the variables studied. The conclusions drawn from the study are that the system is a viable option for the implementation of the project. The implications of the findings are that the system can be used as a model for other similar projects.

In conclusion, the study has shown that the system is effective and can be used as a model for other similar projects. The findings of the study are significant and have important implications for the implementation of the project. The system is a viable option for the implementation of the project and can be used as a model for other similar projects.

NIAGARA  MOHAWK

300 ERIE BOULEVARD WEST  
SYRACUSE, N.Y. 13202

WILLIAM J. DONLON  
PRESIDENT

January 25, 1982

Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Denton:

Nine Mile Point Unit 2  
Docket No. 50-410

In light of the newly defined responsibilities outlined in Niagara Mohawk's letter dated January 22, 1982 from Mr. G. K. Rhode to Mr. A. Schwencer, appropriate changes are being simultaneously proposed for project reporting and interface relationships with the Nuclear Regulatory Commission. Mr. G. K. Rhode, Vice President-System Project Management, will continue to be the formal contact for all matters dealing with implementation of, or noncompliance with, established Quality Assurance Programs. The Nine Mile Point Unit 2 Project Manager and the new Manager-Compliance and Verification will serve as the working interfaces with Nuclear Regulatory Commission inspectors in these areas. Niagara Mohawk Power Corporation's Senior Vice President, Mr. R. C. Clancy, will henceforth be the formal contact for all matters relating to the sufficiency of, or modification to, Corporate or project specific quality assurance programs. The Manager-Quality Assurance Department and the Nine Mile Point Unit 2 Quality Assurance Supervisor will serve as the working interfaces with Nuclear Regulatory Commission inspectors for these matters.

Very truly yours

A handwritten signature in black ink, appearing to read "William J. Donlon".
