King of Prussia, PA 19406

Re: Nine Mile Point Unit 2
Docket No. 50-410

Dear Mr. Starostecki:

Your Inspection Report No. 50-410/81-10 identified a potential program weakness related to reporting of potential deficiencies in accordance with 10 CFR 50.55(e). In response, Niagara Mohawk's letter of November 30, 1981 indicated that we would advise you of the corrective action to be taken. As a result of Niagara Mohawk's Quality Assurance Department audit findings, all Stone and Webster Unit 2 Project engineering and support personnel who disposition and/or process Nonconformance and Disposition Reports (N&D's) both at the engineering headquarters (CHOC) and at the site, will receive additional detailed training. This additional training will address the specific requirements to document on the N&D's whether or not the nonconformance requires evaluation for reportability in accordance with 10 CFR 50.55(e).

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION
