Re: Nine Mile Point Unit 2
Docket No. 50-410

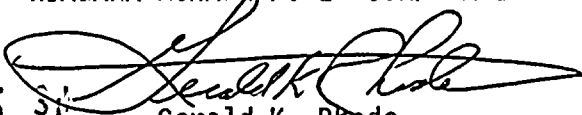

Dear Mr. Starostecki:

Niagara Mohawk's letter of March 3, 1982 responded to the Notice of Violation contained in your Inspection Report No. 50-410/81-14 regarding the Construction Control and Completion Program (CCCP). In this response it was indicated that although measures were being taken to delete the CCCP from the Quality Standards (QS) and Construction Method Procedure (CMP) Manuals, it is Stone and Webster Engineering Corporation's and Niagara Mohawk's intentions to implement the CCCP at the Unit 2 construction site.

Subsequent to this response, it has been decided to leave CCCP in the Quality Assurance implementing procedures (i.e. Quality Standards (QS) and Construction Method Procedures (CMP) Manuals). Although CCCP will continue to be outlined in the above two Unit 2 Quality Assurance Procedure Manuals, it is neither a substitute for nor considered part of the inspection requirements of Criterion X of Appendix B to 10 CFR 50.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

Gerald K. Rhode
Vice President
System Project Management
