Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Dear Mr. Eisenhut:

Our letter dated July 13, 1982 indicated that an interim dose assessment system would be operational by July 31, 1982. The operability of this system was demonstrated during pre-op testing and subsequent trial runs prior to that date. However, since the initial runs, electrical problems have been encountered with the computer hardware located at the vendor's home office. Niagara Mohawk has undertaken efforts to expedite the correction by the computer vendor of this problem. It is anticipated that these problems will be corrected within two weeks. Your office will be notified if the interim dose assessment system is not returned to operability by August 17, 1982.

Sincerely,

T.E. Lempges
Vice President Nuclear Generation
