September 30, 1982

Mr. Darrell G. Eisenhut, Director
Division of Licensing
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Dear Mr. Eisenhut:

Our letter of March 31, 1982 indicated that a description of proposed modifications to the automatic depressurization system logic would be submitted by September 30, 1982. However, a delay in the submittal of this information is required. This delay is necessary in order to consider the effects of:

- 1) the generic analysis being performed by the BWR Owners Group,
- 2) Mark I Containment load mitigation involving low low setpoint logic for the relief valves and
- 3) results of Appendix R safe shutdown analysis

Therefore, a description of the proposed modification to the automatic depressurization system logic will be submitted by December 3, 1982.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

C. V. Mangan
