1. The purpose of this document is to provide a comprehensive overview of the current state of the project. It is intended for the use of the project manager and the steering committee. The document will be updated as the project progresses and new information becomes available.

2. The project is currently in the planning phase. The primary objective is to define the scope, objectives, and deliverables of the project. This phase is critical for the success of the project as it sets the foundation for all subsequent activities.

3. The project team has identified several key risks that could impact the project's progress. These risks include resource availability, budget constraints, and potential changes in requirements. Mitigation strategies have been developed to address these risks.

November 24, 1982

Director of Nuclear Reactor Regulation  
Attn: Mr. Domenic D. Vassallo, Chief  
Operating Reactors Branch #2  
United States Nuclear Regulatory Commission  
Washington, D.C. 20555

Re: Nine Mile Point Unit 1  
Docket No. 50-220  
DPR-63

Gentlemen:

Our letter dated October 25, 1982 stated that we would respond to the Technical Evaluation Report, "Comparison of Plant and Model Radiological Effluent Technical Specifications and Plant Offsite Dose Computational Manual, Nine Mile Point Nuclear Station Unit 1" dated June 21, 1982 by November 30, 1982.

We have completed our review of the Technical Evaluation Report. We are currently revising our Radiological Effluent Technical Specifications and Offsite Dose Calculation Manual based on our understanding of your comments in the Technical Evaluation Report and agreements reached during your site visit on May 25 and 26, 1982. It is anticipated that this revision will be submitted by March 1, 1983.

Sincerely,

*C. V. Mangan*  
C. V. Mangan  
Vice President  
Nuclear Engineering & Licensing
