GERALD K. RHODE
SENIOR VICE PRESIDENT

April 18, 1983

Mr. A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Schwencer:

Re: Nine Mile Point Unit 2
Docket No. 50-410

On February 1, 1983, the Nuclear Regulatory Commission approved the Gulf States Utilities Company Safety-Related Instrument Tubing and Supports Program for the River Bend Station (Docket No. 50-458).

We have reviewed and evaluated the Gulf States Utilities Company program for its applicability to Nine Mile Point Unit 2 and propose implementing a similar program at Unit 2 with the following differences:

- At Nine Mile Point Unit 2, Quality Assurance inspection will be performed by the subcontractor performing the installation who is an N Certificate holder.
- With respect to the third-party inspection, our Architect/Engineer (Stone & Webster Engineering Corporation) Field Quality Control will perform the third-party surveillance.

It is our intent to implement the program for Nine Mile Point Unit 2 on May 1, 1983 and will incorporate this program change in our Final Safety Analysis Report in an amendment to be submitted by June 8, 1983. In the interim, of course, we would be pleased to meet with you and your staff to discuss the details of this program should you believe it necessary.

Very truly yours,

G. K. Rhode
Senior Vice President
