May 11, 1983

Mr. Darrell G. Eisenhut, Director
Division of Licensing
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Dear Mr. Eisenhut:

Your letter of July 26, 1982 requested a schedule for providing information relative to NUREG 0737, Item II.B.3 Post Accident Sampling Capability. Our letter of December 30, 1982, in response to Criterion (2) stated that we did not have a formal procedure for relating radionuclide concentrations to core damage. Our current schedule is to have a formal procedure by start-up from the planned 1984 refueling outage. In addition, in response to Criterion (6), we indicated that person-motion studies would be performed by May, 1983. The current schedule calls for performance of these studies by July 31, 1983.

Very truly yours,

C. V. Mangan

C. V. Mangan
Vice President
Nuclear Engineering & Licensing
