Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Dear Mr. Vassallo:

Our letters of October 1, 1982 and December 3, 1982 stated that the two remote shutdown panels were completely independent of each other. A recent Appendix R related modification has resulted in the two panels no longer being independent. This configuration is acceptable since two independent remote shutdown panels is not a requirement. However, our remote shutdown system continues to meet all applicable regulatory requirements. This change to the remote shutdown panels does not alter any of the conclusions regarding the safe shutdown capability per fire area or fire sub-area of Nine Mile Point Unit 1. Also, the modifications and implementation schedules proposed in our October 1, 1982 and December 3, 1982 Appendix R submittals remain unchanged.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION

Thomas E. Lempges
