June 24, 1983

Mr. Domenic B. Vassallo, Chief  
Operating Reactors Branch No. 2  
Division of Licensing  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Re: Nine Mile Point Unit 1  
Docket No. 50-220  
DPR-63

Dear Mr. Vassallo:

Our June 1, 1981 letter provided a general description of the existing Emergency Operations Facility for the Nine Mile Point site. As indicated in the referenced correspondence, the existing Energy Information Center at the Nine Mile Point site is being utilized as the Emergency Operations Facility. Our current plans are to construct a new training center which will incorporate a new Emergency Operations Facility. This will replace the existing primary Emergency Operations Facility upon completion of construction. The attached figure depicts the proposed location of this training center relative to Nine Mile Point Units 1 and 2. Space within the training center will be dedicated for the accomplishment of critical Emergency Operations Facility functions. Compliance with the guidelines of Supplement 1 to NUREG 0737 will be a primary objective during construction of the new Emergency Operations Facility.

Construction of the training center, and the new Emergency Operations Facility, is tentatively scheduled for completion in Spring 1984. This is only a tentative schedule and may be subject to change due to unforeseen construction delays. A more accurate schedule will be submitted in our letter regarding Emergency Response Facilities which, in accordance with our April 15, 1983 letter, will be submitted by January 1, 1984. During the interim, we will continue to use the existing Emergency Operations Facility.

Very truly yours,

*C. V. Mangan*
