Operating Reactors Branch No. 2
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Dear Mr. Vassallo:

Our letter of December 30, 1982 discussed improvements being made in the primary containment vent and purge system. These improvements were being made to preclude operation of the large diameter vent and purge valves for post loss of coolant accident venting.

Our letter also indicated that an evaluation into further system improvements was being performed. The results of that evaluation indicate that no further modifications are warranted, however, some minor procedural changes are being investigated.

Very truly yours,

C. V. Mangan
