The image shows a single page of a document that is extremely faded and blurry. The text is mostly illegible, appearing as faint horizontal lines and scattered characters. There are some darker, more distinct marks that could be remnants of text or images, but they are not clear enough to transcribe. The overall appearance is that of a very poor quality scan of an old document.

Washington, D.C. 20555

Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Dear Mr. Vassallo:

In our December 31, 1981 letter, we submitted documentation for TMI Action Item II.B.2., Design Review of Plant Shielding and Environmental Qualification of Equipment for Spaces/Systems Which May Be Used in Post Accident Operations. Based on this study, we concluded that our requirements regarding NUREG 0737, Item II.B.2. were being met at Nine Mile Point Unit 1.

Subsequent reviews of our shielding design review study indicate that some of our original assumptions may have been erroneous. We are in the process of re-examining these assumptions. If it is determined that any of our assumptions were in error, we will inform you and proceed to revise the study accordingly.

Very truly yours,

C. V. Mangan

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is responsible for the study. The next step is the collection of data. This is done by the investigator who is responsible for the study. The third step is the analysis of the data. This is done by the investigator who is responsible for the study. The fourth step is the interpretation of the results. This is done by the investigator who is responsible for the study. The fifth step is the conclusion. This is done by the investigator who is responsible for the study.
