Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Dear Mr. Vassallo:

Our April 15, 1983 letter regarding Supplement 1 to NUREG 0737 indicated that a plant specific summary report addressing Control Room Design Review efforts would be submitted by October 1, 1983. Clarification of the intended content of this report has been requested by members of your staff and is provided below. Briefly, our intentions are to provide the following information:

- ° A summary of the results of efforts undertaken to identify human engineering discrepancies,
- ° A description of our program plan to complete control room design review activities, including methodology to identify, prioritize, and resolve human engineering discrepancies, and
- ° A schedule for submitting an implementation plan to correct deficiencies/improve control room design. This implementation plan will contain as much detailed scheduling information as is available.

Additionally, the tasks identified in your April 19, 1983 letter as being necessary to fully respond to Item I.D.1 of NUREG 0737 will be addressed.

Very truly yours,

C. V. Mangan
Vice President

Nuclear Engineering and Licensing
