Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Dear Mr. Vassallo:

Our December 30, 1982 letter provided an anticipated date of November 30, 1983 for completing the preoperational test of the gas portion of the post accident sampling system. The preoperational test has been written and approval by the Site Operations Review Committee is currently being pursued. Subsequent to obtaining this approval, the preoperational test will be conducted. Our revised schedule for completing this test is by the end of our 1984 refueling outage. As described in our October 20, 1981 and December 30, 1982 letters, a provisional method for obtaining a containment atmosphere sample can be used during the interim.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION
