June 13, 1984  
(NMP2L 0080)

Mr. A. Schwencer  
Chief, Licensing Branch No. 2  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Re: Nine Mile Point Unit 2  
Docket No. 50-410

Dear Mr. Schwencer:

This letter is provided in response to your request for additional information dated May 21, 1984, with regard to changes in the Niagara Mohawk nuclear management organization.

As I indicated in my letter of May 11, 1984, Messrs. Hooten and Perry have assumed senior level positions in Niagara Mohawk Management in order to provide additional management expertise in the areas of reactor construction and operation. The tasks immediately before us as we complete construction of Nine Mile Point Unit 2 and work toward improved performance in the operation of Nine Mile Point Unit 1 demand that we commit the highest level of skilled and experienced management personnel. Both Messrs. Hooten and Perry were brought into the management organization because they have the requisite skill and experience to augment substantially Niagara Mohawk's Nuclear Management staff during this critical period as bulk construction at Nine Mile Point Unit 2 is completed and efforts focus on the more complex preoperational testing phase.

As construction progresses and we come nearer to regular reactor operation at Nine Mile Point Unit 2, Niagara Mohawk Nuclear Management personnel will assume greater responsibility. This adjustment will include the ultimate replacement of Messrs. Hooten and Perry by the introduction of Niagara Mohawk Management Employees into the positions they now occupy. The individuals chosen to fill these positions will be selected well in advance of their actual assumption of duties, either from within or without the present Niagara Mohawk Management Organization, and will be individuals identified by the Corporation as possessing the highest levels of Management skill, experience and expertise in Nuclear Operations.

[The text in this block is extremely faint and illegible, appearing as a collection of scattered black specks and noise on a white background.]

It should be kept in mind that Niagara Mohawk Management has nearly 15 years of experience in the operation of a nuclear reactor; and has been in the process of training site management staff for Nine Mile Point 2 for some time. We are confident that the site management staff now being assembled and trained, coupled with a skilled and experienced senior management team will ensure the safe and efficient start-up and operation of the nuclear reactor at Nine Mile Point 2.

Revised FSAR writeups and updated organizational charts for Nine Mile Point Unit 2 will be provided by July 30, 1984. These charts will reflect the organizational changes in project management, quality assurance and initial testing organizations.

Very truly yours,

William J. Donlon  
President
