U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Re: Nine Mile Point Unit 1  
Docket No. 50-220  
DPR-63

Dear Mr. Vassallo:

Our April 30, 1984 letter provided information and schedules related to the generic implications of the Salem Anticipated Transient Without Scram events (Generic Letter 83-28). In particular, Niagara Mohawk indicated that an evaluation of the Boiling Water Reactor Owners Group options pertaining to the reactor trip system would be completed by June 30, 1984. Because of the resources required to support the 1984 refueling and maintenance outage, additional time is required for the evaluation and development of an action plan. Therefore, this information will be submitted by July 31, 1984.

Sincerely  
*T. E. Lempges*  
T. E. Lempges
