June 29, 1984

Director of Nuclear Reactor Regulation
Attention: Mr. Domenic B. Vassallo, Chief
Operating Reactors Branch No. 2
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Dear Mr. Vassallo:

Niagara Mohawk's June 8, 1984 response to Generic Letter 84-09 indicated that our final evaluation regarding the applicability of the Boiling Water Reactor Owners Group report to Nine Mile Point Unit 1 would be complete by June 29, 1984. Since submittal of our June 8, 1984 letter, the Owners Group has decided to determine the limiting iodine concentration above which radiolysis is a concern for each of the utility participants listed in the Owners Group report. The schedule for completing this evaluation is mid July 1984. Therefore, Niagara Mohawk's final evaluation will not be completed until the end of July 1984. Our current plans are to inform your office of the results of our final evaluation by July 31, 1984.

Very truly yours,

T. E. Lempges
Vice President
Nuclear Generation
