Washington, D.C. 20555

Re: Nine Mile Point Unit 1  
Docket No. 50-220  
DPR-63

Dear Mr. Vassallo:

Your December 22, 1980 and February 3, 1981 letters requested information regarding the control of heavy loads at Nine Mile Point Unit 1. Our May 22, 1981, July 28, 1981, September 22, 1981, August 1, 1982, September 30, 1983, November 15, 1983, December 15, 1983 and July 26, 1984 letters provided the requested information. During a discussion with members of your staff, additional information was requested on our special lifting device inspection program.

Our proposed inspection program on special lifting devices is as follows. Perform a magnetic particle nondestructive examination (over the paint or other protective coating) on approximately ten percent of the critical, load bearing, accessible welds annually. After ten years, reassess the entire program to determine whether or not a revision to the program is necessary. The initial ten year program will begin in 1985.

Very truly yours,

T. E. Lemppes  
Vice President  
Nuclear Generation
