

APPENDIX A

Notice of Violation

Niagara Mohawk Power Company
Nine Mile Point Unit No. 2

Docket No. 50-410
License No. NPF-54

As a result of the inspection conducted on January 4, 1987, to March 1, 1987, and in accordance with NRC Enforcement Policy (10 CFR Part 2, Appendix C) the following violation was identified:

10 CFR 21.21 (b) (2) requires, in part, that a director or responsible officer or a designated person shall notify the Commission when he obtains information reasonably indicating a failure to comply or a defect which could create a substantial safety hazard, within two days following receipt of the information. If the initial notification is by means other than written communication, a written report shall be submitted within 5 days after the information is obtained.

Contrary to the above, the Commission was not notified within five days of a determination made on January 23, 1987 that the loss of heating for the Standby Gas Treatment System was a defect which could create a substantial safety hazard.

This is a Severity Level V Violation. (Supplement VII)

Pursuant to the provisions of 10 CFR 2.201, Niagara Mohawk Power Company is hereby required to submit to this office within thirty days of the date of the letter which transmitted this Notice, a written statement or explanation in reply, including: (1) the corrective steps which have been taken and the results achieved; (2) corrective steps which will be taken to avoid further violations; and (3) the date when full compliance will be achieved. Where good cause is shown, consideration will be given to extending this response time.
