Re: Nine Mile Point Unit 2  
Docket No. 50-410

Gentlemen:

The purpose of this letter is to request that the attached Technical Specification change for Nine Mile Point Unit 2 be incorporated into the full power license when it is issued. Issuance of the full power license should not be delayed in order to incorporate the attached Technical Specification change. The attached page replaces page 6-4 in its entirety and a marginal marking has been provided to indicate the change.

The change entails the removal of the asterisk footnote as it applies to the position entitled "General Superintendent Nuclear Generation." This change is being made in order to increase the accessibility of this management position to upper management activities. This position is being relocated to our Nuclear Division offices. The General Superintendent Nuclear Generation's responsibilities and authority, as defined in Technical Specifications, is unaffected by this relocation. Since our Nuclear Division offices are less than one hour's drive from the Nine Mile Point Nuclear Site, the General Superintendent Nuclear Generation's ability to participate in site activities is undiminished. The person fulfilling this position will continue to maintain an office at the site.

Very truly yours,

NIAGARA MOHAWK POWER CORPORATION
