Martha Girard, Director
Executive Agencies Division
Office of the Federal Register

Dear Ms. Girard:

Emergency publication in the Federal Register is requested for the enclosed Environmental Assessment for Nine Mile Point Nuclear Station Unit No. 2 (NMP-2). The reason for this urgency is that the NMP-2 full power license is expected to be issued on July 1, 1987 and this notice is required for that issuance.

Sincerely,

Robert A. Capra, Acting Director
Project Directorate I-1
Division of Reactor Projects, I/II
