Docket No. 50-245
E10184

Director of Nuclear Reactor Regulation
Attn: Mr. Dennis M. Crutchfield, Chief
Operating Reactors Branch #5
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Reference: (1) W. G. Council letter to D. M. Crutchfield, dated April 29, 1980.

Gentlemen:

Millstone Nuclear Power Station, Unit No. 1
Station Electric Distribution System Voltages

In response to NRC Questions (1), (2), and (3) in Reference (1), Northeast Nuclear Energy Company (NNECO) stated that information concerning the specified design modifications would be available in early 1981. Due to the present extended refueling outage and the significant amount of effort involved in the design phase for these modifications, this information will not be available until the end of 1981. However, these modification are still scheduled for implementation during the next refueling outage.

Should you have any questions, please feel free to contact us.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY
