Pursuant to Section 50.90 of the regulations of the Nuclear Regulatory Commission, Niagara Mohawk Power Corporation, holder of Facility Operating License No. DPR-63, hereby requests sections to Specifications 3.2.2 and 4.2.2 of the Technical Specifications set forth in Appendix A to that License be amended. These proposed changes have been reviewed in accordance with Section 6.5 of the Technical Specifications.

The proposed Technical Specification changes are set forth in Attachment A to this application. Pages 77 and 78, Figures 3.2.2.a, b and c and associated tables have been proposed for amendment in order to reflect a change in the limits for minimum reactor vessel temperature for pressurization. These limits are based on measured nil-ductility temperature shifts of irradiated Nine Mile Point Unit 1 reactor vessel material specimens. Supporting information and analysis which demonstrate that the proposed changes involve no significant hazards considerations pursuant to 10CFR50.92, are included as Attachment B.
