Dear Mr. Mangan:

SUBJECT: SAFETY EVALUATION - GENERIC LETTER 83-28, ITEM 1.2

Re: Nine Mile Point Nuclear Station, Unit No. 1

We have completed our review of your submittals dated November 8, 1983 and December 31, 1985 regarding your response to Generic Letter 83-28 for Item 1.2, Post-Trip Review - Data and Information Capability.

Based on our review of the information you provided in the above stated submittals and by telecon on November 26, 1985, we find that your post-trip review data and information capabilities are acceptable. However, we recommend that your recording capability for neutron flux (power) at the facility be upgraded.

The Safety Evaluation supporting our findings is enclosed.

Sincerely,

Original signed by:

John A. Zwolinski, Director
