U.S. Nuclear Regulatory Commission
7920 Norfolk Avenue
Washington, DC 20555

Dear Ms. Adensam:

Re: Nine Mile Point Unit 2
Docket No. 50-410

During the December 6, 1985 site meeting with NRC representatives, we discussed the schedule for the drywell spray reanalysis. The drywell spray reanalysis is described in the Safety Evaluation Report, NUREG-1047, Supplement No. 2 (SSER2), Subsection 13.5.2.3.1(1)(b). This section calls for Niagara Mohawk to supply a schedule for resolving this issue. However, in our March 10, 1986 letter (NMPL 0658) we mistakenly committed to make a submittal to you by April 18, 1986, which would be prior to fuel load. This commitment date is actually April 18, 1987, which is consistent with our previous discussions.

Very truly yours,

C. V. Mangan
C. V. Mangan

1. The first part of the report is a general introduction to the subject of the study. It discusses the importance of the study and the objectives of the research.

2. The second part of the report is a detailed description of the methodology used in the study. It includes information about the sample size, the data collection methods, and the statistical analysis techniques.

3. The third part of the report is a presentation of the results of the study. It includes a summary of the findings and a discussion of the implications of the results. The results show that there is a significant relationship between the variables studied, and the findings have important implications for the field of research.

4. The fourth part of the report is a conclusion and a list of references. The conclusion summarizes the main findings of the study and provides a final statement on the research. The references list the sources of information used in the study.

5. The fifth part of the report is a list of appendices. These appendices provide additional information that supports the findings of the study, such as raw data, detailed statistical results, and other relevant documents.

6. The sixth part of the report is a list of figures and tables. These figures and tables provide a visual representation of the data and results, making it easier to understand the findings of the study.
