The proposed revisions will be made available for public comment 30 days before the public hearing with a request for comments pending review by our legal department. We request NRC's comments by May 30, 2017. The proposed regulations are identified by line-in/line-out text (or similar identification) and correspond to the following equivalent amendments to NRC's regulations.

<u>Rats ID</u>	<u>Title</u>	<u>State Section</u>
• 2015-1	Domestic Licensing of Special Nuclear Material - Written Reports and Clarifying Amendments	180 NAC 3

We believe that adoption of these revisions satisfies the compatibility and health and safety

categories established in the Office of Nuclear Material Safety and Safeguards (NMSS) Procedure SA-200.

Note: As of July 2016, Nebraska's Governor's Policy Research Office (GPRO) requires all instances of abbreviations and acronyms to be spelled out within the body of proposed regulations. The exception is when making reference to federal or state statutes and regulations, which need to be spelled out only during their first occurrence within the regulations.
