Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Dear Mr. Zwolinski:

Niagara Mohawk Power Corporation intends to make use of ASME Code Cases N-341 and N-356, approved June 17, 1982 and June 16, 1982 respectively, to extend the certification period of Level III examiners from three years to five years.

ASME Code Cases N-341 and N-356 will be used at Nine Mile Point Nuclear Power Station Unit 1 for the following applications:

- N-341 To extend Level III NDE Examiner certification period to five (5) years for ASME Section III, Divisions 1 and 2.
- N-356 To extend Level III NDE Examiner certification period to five (5) years for ASME Section XI, Divisions 1, 2, and 3.

The above code cases were approved for the Clinton Power Station in April, 1983. Code Case N-341 was included in revision 23 of Regulatory Guide 1.84 in September, 1985. Code Case N-356 was incorporated into ASME Section XI in the Winter 1983 Addenda.

The Inservice Inspection Program for Nine Mile Point Unit 1 is written in accordance with the 1983 Edition of ASME Section XI, Summer 1983 Addenda. Station procedures will be revised as applicable to implement this change.

Sincerely,

NIAGARA MOHAWK POWER CORPORATION
