Ms. Elinor G. Adensam, Director
BWR Project Directorate No. 3
U.S. Nuclear Regulatory Commission
7920 Norfolk Avenue
Washington, DC 20555

Dear Ms. Adensam:

Re: Nine Mile Point Unit 2
Docket No. 50-410

As requested by the Nuclear Regulatory Commission staff, this letter provides further information in support of Niagara Mohawk Power Corporation's application contained in letters dated May 7, 1986 and June 13, 1986 for schedular exemptions pursuant to 10 CFR 50.12(a). The application included a request for relief from the requirements of 10 CFR 50.57(a) to allow the completion of construction, preoperational testing and post-test review for certain designated systems subsequent to the issuance of an operating license for Nine Mile Point Unit 2.

The Nuclear Regulatory Commission staff has requested that NMPC designate those portions of Title 10, Code of Federal Regulation, and, in particular, General Design Criteria, 10 CFR Part 50, Appendix A, associated with the systems for which an exemption is sought. The requested designation is provided below:

<u>System</u>	<u>Regulations and General Design Criteria</u>
Reactor Coolant and ECCS Leak Detection System	10 CFR 50.34a; GDC 2, 30, 64
Offgas System	10 CFR 50, Appendix I, 10 CFR 50.34a 10 CFR 20.106; GDC 3, 60
Containment Atmospheric Monitoring System	10 CFR 50.34a, .50.44; GDC 2, 4, 13, 41, 64
DBA Hydrogen Recombiner System	10 CFR 50.44, 50.46; GDC-5, 41, 42, 43

8607080243 860703
PDR ADOCK 05000410
A PDR

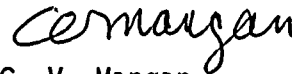

Boo1
110

It should be noted that each system will have been installed, tested and reviewed prior to the time it is required to be operable by the plant technical specifications as justified in the safety analysis accompanying the requests.

Niagara Mohawk is ready to meet with the cognizant Nuclear Regulatory Commission personnel to review this matter should you require additional information.

Very truly yours,

C. V. Mangan
Senior Vice President
