Division of BWR Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Re: Nine Mile Point Unit 1
Docket No. 50-220
DPR-63

Dear Mr. Zwolinski:

Our letter of May 27, 1986 provided a Technical Specification Amendment Application that is needed to allow Niagara Mohawk to demonstrate the feasibility of a hydrogen water chemistry system as a mitigator of intergranular stress corrosion cracking of stainless steel piping at Nine Mile Point Unit 1. Based on requests from members of your staff, this letter provides supplemental information to support the Technical Specification change regarding locked gates for high radiation areas.

During the hydrogen water chemistry test, extensive inplant radiation surveys will be conducted. As a result of these surveys, radiation levels will be posted and areas roped off to reflect changes in 1,000 mRem/hr boundaries.

Sincerely,

NIAGARA MOHAWK POWER CORPORATION

T. E. Lempges
Vice President
Nuclear Generation
