

NIAGARA MOHAWK POWER CORPORATION/300 ERIE BOULEVARD WEST, SYRACUSE, N.Y. 13202/TELEPHONE (315) 474-1511

July 11, 1986 (NMP2L 0780)

Ms. Elinor G. Adensam, Director BWR Project Directorate No. 3 U.S. Nuclear Regulatory Commission 7920 Norfolk Avenue Washington, DC 20555

Dear Ms. Adensam:

Re: Nine Mile Point Unit 2 Docket No. 50-410

Niagara Mohawk's March 3, 1986 letter provided a commitment relative to the undervoltage relay. The testing to confirm the setting on the undervoltage relay has been completed and accepted by Engineering, but it has not been reviewed by the Joint Test Group or Site Operations Review Committee. The test results verified the analytical techniques and assumptions used to perform the degraded grid voltage analysis described in FSAR Section 8.2.2. Our studies show that the computer analysis performed conforms to the general criteria set forth in Branch Technical Position (BTP) PSB-1, Item 4 of Section B. Further, we have discussed these results with the Nuclear Regulatory Commission's resident inspector on site.

Very truly yours,

T. E. Lempges
Vice President
Nuclear Generation
