Ms. Elinor G. Adensam, Director
BWR Project Directorate No. 3
U.S. Nuclear Regulatory Commission
7920 Norfolk Avenue
Washington, DC 20555

Dear Ms. Adensam:

Re: Nine Mile Point Unit 2
Docket No. 50-410

This letter provides status information relative to the Nine Mile Point Unit 2 solid radwaste system. My letter of April 11, 1986 (NMP2L 0684) stated that WasteChem Corporation was planning to submit additional test results on their volume reduction and solidification system to the Division of Waste Management by May 15, 1986, and that we planned to submit those results to you by May 30, 1986. That letter also stated that in the event the WasteChem system is not approved by the Office of Nuclear Material Safety and Safeguards by the time it is required, we intend to use the contract service of NUS to solidify wastes on an interim basis. Additional information on the NUS system for your review was provided in my letter of May 19, 1986 (NMP2L 0719).

WasteChem Corporation submitted its Topical Report entitled, "10 CFR 61 Waste Form Conformance Program for Solidified Process Waste Products Produced by a WasteChem Corporation Volume Reduction and Solidification (VRS) System," to the Division of Waste Management on May 30, 1986 (see cover letter, Attachment 1). As stated in that letter, the results of the long-term biodegradation were not included in the report but will be subsequently submitted.

The Division of Waste Management acknowledged the receipt of WasteChem Corporation's topical report and presented the schedule for its review in a letter to WasteChem Corporation dated June 11, 1986 (Attachment 2). According to that schedule, the topical report was to be transmitted to the Office of Nuclear Reactor Regulation on June 19, 1986; the review is to be completed, and the case closed by September 14, 1987.

The above is presented to keep you informed. We will continue with our plans, as found acceptable in the Safety Evaluation Report, Supplement 3, to utilize the NUS system on an interim basis until the staff completes its review of the WasteChem Topical Report on 10 CFR 61 Waste Form Conformance Program. If there are any questions on this matter, please contact Mr. Cushman, of my staff.

Very truly yours,

C. V. Mangan
Senior Vice President
