

UNITED STATES NUCLEAR REGULATORY COMMISSION  
NIAGARA MOHAWK POWER CORPORATION  
DOCKET NO. 50-220  
WITHDRAWAL OF APPLICATION FOR AMENDMENT  
TO FACILITY OPERATING LICENSE

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Niagara Mohawk Power Corporation (the licensee) to withdraw its January 29, 1986 application for amendment to Facility Operating License No. DPR-63 issued to the licensee for operation of the Nine Mile Point Nuclear Station, Unit No. 1 (NMP1) located in Oswego County, New York. Notice of consideration of issuance of this amendment was published in the FEDERAL REGISTER on April 9, 1986 (51 FR 12231).

The request proposed changes to Section 3.6 of the Appendix A Technical Specifications (TS) regarding the Fire Protection Program. The amendment was to reflect: (1) changes consistent with the Standard Technical Specifications; (2) editorial changes; and (3) changes reflecting plant modifications. As a result of the issuance of Generic Letter 86-10, Implementation of Fire Protection Requirements, the request for amendment is no longer required since the licensee's current fire protection program will be incorporated into the Final Safety Analysis Report.

By letter dated May 15, 1986, the licensee requested, pursuant to 10 CFR 2.107, permission to withdraw its January 29, 1986 application. The Commission has considered the licensee's request and has determined that permission to withdraw the January 29, 1986 application for amendment should be granted.

For further details with respect to this action, see (1) the application for amendment dated January 29, 1986, (2) the licensee's request for withdrawal dated May 15, 1986, and (3) the Commission's letter dated July 30, 1986. All of the above documents are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW, Washington, D.C., and at the State University of New York, Penfield Library, Reference and Documents Department, Oswego, New York 13126.

Dated at Bethesda, Maryland, this 30th day of July 1986.

FOR THE NUCLEAR REGULATORY COMMISSION
