ENCLOSURE

Category I:

Section II, item 11 is listed as a Category I item. This is partially correct. However, the comments on page 6 of NMPC's letter of July 16, 1986, relating to makeup water from the cooling water system was noted in our letter of September 3, 1986, as being unclear and needing additional information. Additional information was provided in NMPC's letter of September 12, 1986, and is under review.

Category II:

The following issues listed in Category II do not fit the description of Category II.

Items 15, 49, 69, 81, 87, 109, and 131 are open items which require, to close, either additional justification, corrected references, or a statement that the original NMPC statement was incorrect.

Item 89 does not fit Category II exactly but a statement by NMPC that the original comment is being withdrawn will be sufficient to close this issue.

Item 147 will be revised in a future SER supplement to indicate the correct values, not the ones in NMPC's comment.

Items 151 and 154 were revised in Supplement 1 to the SER.

Category IV:

The comment stating 123 is partially in Category IV is not understood; nor has additional information been provided as indicated.

Category V:

Section II, items 156-159 were provided in our letter of 9/18/86.
