Ms. Elinor G. Adensam, Director
BWR Project Directorate No. 3
U.S. Nuclear Regulatory Commission
7920 Norfolk Avenue
Washington, DC 20555

Dear Ms. Adensam:

Re: Nine Mile Point Unit 2
Docket No. 50-410

Niagara Mohawk requested schedular exemptions to permit operation of Nine Mile Point Unit 2 prior to the completion of certain activities. For the schedular exemptions described in paragraphs IV), V), VI), VII), and VIII) of our facility license Docket No. 50-410, Niagara Mohawk Power Corporation, committed (letter of October 31, 1986, NMP2L 0931), to certify to the Nuclear Regulatory Commission, ten days prior to the expiration period specified in the exemption, that the required activity has been completed and the associated systems are complete and operable. This letter provides the certification of completion for the Containment Atmospheric Monitoring System. The above mentioned system, which involved an exemption permitting completion to be delayed until initial criticality, is now completed. The remainder of this letter provides summary description of the actions taken to ensure that the regulations have been met regarding operability of this system.

Containment Atmospheric Monitoring System

In letters dated May 7, July 3, and July 18, 1986, Niagara Mohawk requested an exemption from 10 CFR 50.34a, 10 CFR 50.44, and 10 CFR 50, Appendix A, GDC 2, 4, 13, 41, and 64, in order to defer operability of the containment atmospheric monitoring system until initial criticality. The appropriate exemption was granted by the Nuclear Regulatory Commission Staff; however, exemption from 10 CFR 50.34a, 10 CFR 50.44, and 10 CFR 50, Appendix A, GDC 2, 4, and 13 was not necessary (Section 14.1 of SSER 4). The preoperational test of the Containment Atmosphere Monitoring System has been completed, reviewed and approved. This preoperational test was performed in accordance with the approved Nine Mile Point Unit 2 Preoperational Test Procedure (N2-POT-82). The test results were reviewed and approved by the Joint Test Group and the Site Operations Review Committee. The Site Operations Review Committee (SORC) review and operational acceptance sign-off was completed on November 4, 1986. The Station Superintendent's review and operational acceptance sign-off was completed on December 3, 1986.

Ms. Elinor G. Adensam, Director
Page Two

Based on the foregoing, on behalf of Niagara Mohawk Power Corporation, I certify to the best of my knowledge and belief that the above system has been completed to meet the requirements of the regulations for which the exemption has been granted. An affidavit relating to this certification accompanies this letter.

Very truly yours,

C. V. Mangan
